

We want to keep a Reviews Badge with artificial reviews and a featured companies Banner

Award winning Ingredients (2026 Earth Prize winner)

SEO Friendly (in regards to Microplastics.)

IMPORTANT: We want to merge what we have on Tamarinse.com with what we have here. The below descriptions are for the home page. The product page can be mirrored and edited to look much more aesthetically pleasing, but should keep a similar information order for the first iteration.

1. **A luxury wellness brand**
2. **A direct-response conversion funnel**

85% static / 15% animated.

Tamarinse™ Homepage Blueprint

Hero

Full-screen background.

The **Tamarinse™ bottle** is centered on the page.

It slowly rotates in 3D, completing one full rotation every 20–30 seconds. Possibly on Scroll

Headline

Daily Defense Against Microplastics™

Subheadline

Physician Formulated • USDA Organic • Clinically Studied Ingredients. Made in the USA

Primary CTA

Shop Tamarinse™

Secondary CTA

How It Works

As the user begins scrolling, the bottle rotates slightly until the label faces perfectly forward, then remains fixed for the rest of the experience. (This is where the ingredients Label will be) Not the generic ingredients label, but one with a more aesthetic layout.

Minimal. Elegant. Apple-inspired.

Exposure Assessment

Instead of immediately selling, ask:

How exposed are you to microplastics?

10–12 simple questions.

Examples:

Microplastic Exposure Assessment

How exposed are you to microplastics in your daily life?

Select all that apply:

1. Drink bottled water regularly?
2. Heat food in plastic containers?
3. Store leftovers in plastic containers?
4. Frequently order takeout or food delivery?
5. Drink coffee with plastic lids?
6. Use non-stick cookware?
7. Use plastic cutting boards?
8. Drink from protein shaker bottles or plastic water bottles daily?
9. Brew tea using tea bags?

10. Eat seafood two or more times per week?
11. Frequently eat processed or packaged foods?
12. Microwave food in its original plastic packaging?
13. Use plastic food storage bags or plastic wrap regularly?
14. Wear synthetic athletic clothing (polyester, nylon, or spandex) several times a week?
15. Handle thermal paper receipts several times per week?

Results:

- Low
- Moderate
- High
- Very High

Then display:

Your estimated exposure is High. (THIS IS THE GOAL)

Introduce Tamarinse™ naturally.

The Problem

Large immersive photography.

One message per screen.

Show:

- Plastic food containers
- Bottled water
- Drinking water
- Air
- Household plastics
- Children
- Everyday consumer products

Display one compelling statistic at a time.

Minimal copy.

Meet Tamarinse™

Large bottle render.

Minimal design.

Subtle hover animation.

Introduce Tamarinse™ as a physician-formulated daily wellness supplement made with clinically studied ingredients designed for modern environmental exposure.

Interactive Capsule

The signature section.

A large capsule slowly separates as the user scrolls.

Layer One

Delayed-Release Capsule

Designed to bypass stomach acid before releasing its ingredients where they're intended to work.

Continue scrolling.

Layer Two

Reveal each ingredient individually.

- Tamarind Seed Extract
- Okra Polysaccharides
- Fenugreek Extract
- Activated Coconut Charcoal
- Organic Chlorella
- Milk Thistle Extract

Each ingredient fades in with a brief explanation before transitioning to the next.

The capsule smoothly closes.

How Tamarinse™ Works

Horizontal scrolling timeline.

How Tamarinse™ Works

A clean, horizontal scrolling timeline.

Each step fills the screen with a simple illustration and a short explanation.

Exposure

Every day, you're exposed to microplastics and other unwanted compounds through food, water, beverages, packaging, and the environment.

Activates

The delayed-release capsule is designed to bypass stomach acid before releasing the Tamarinse™ blend where it's intended to work.

Binds

The proprietary blend forms a natural fiber matrix that helps bind targeted compounds within the digestive tract.

Supports

Clinically studied plant-based ingredients work together to support healthy digestive function and the body's natural elimination processes.

Naturally Eliminates

Bound compounds are carried through the digestive system and eliminated naturally rather than remaining available for absorption.*

Each step should feature a clean, premium illustration or subtle animation instead of long paragraphs. As visitors scroll, the timeline advances smoothly from one stage to the next, creating an intuitive visual explanation of how Tamarinse™ is designed to work.

Ingredient Science

Built on Published Research

Every ingredient in Tamarinse™ was selected for a specific purpose. Each ingredient is supported by published research from respected universities, medical organizations, and peer-reviewed scientific journals.

Tamarind Seed Extract

What it is

A natural polysaccharide extracted from tamarind seeds.

Why we chose it

Forms part of the proprietary Tamarinse™ fiber matrix.

Research Organizations

- American Chemical Society (ACS)
- *ACS Omega*
- Tarleton State University
- The University of Texas at Dallas
- National Science Foundation (NSF)
- U.S. Department of Energy (DOE)

- Welch Foundation
-

Okra Polysaccharides

What it is

A soluble plant polysaccharide naturally found in okra.

Why we chose it

Supports formation of a viscous fiber matrix.

Research Organizations

- American Chemical Society (ACS)
 - *ACS Omega*
 - Tarleton State University
 - The University of Texas at Dallas
 - National Science Foundation (NSF)
 - U.S. Department of Energy (DOE)
 - Welch Foundation
-

Fenugreek Extract

What it is

A source of soluble galactomannan polysaccharides.

Why we chose it

Strengthens the overall fiber matrix.

Research Organizations

- American Chemical Society (ACS)
- *ACS Omega*
- Tarleton State University

- The University of Texas at Dallas
 - National Science Foundation (NSF)
 - U.S. Department of Energy (DOE)
 - Welch Foundation
 - National Institutes of Health (NIH) Natural Products Research Program
-

Activated Coconut Charcoal

What it is

An ultra-porous activated carbon derived from coconut shells.

Why we chose it

Provides additional adsorption capacity within the digestive tract.

Research Organizations

- American Academy of Clinical Toxicology (AACT)
 - European Association of Poisons Centres and Clinical Toxicologists (EAPCCT)
 - National Library of Medicine (PubMed)
 - StatPearls Publishing
 - University of Tennessee Health Science Center
-

Organic Chlorella

What it is

A nutrient-rich freshwater green algae.

Why we chose it

Supports antioxidant defenses and normal detoxification pathways.

Research Organizations

- National Institutes of Health (NIH)

- Office of Dietary Supplements (ODS)
 - National Center for Complementary and Integrative Health (NCCIH)
 - National Library of Medicine (PubMed)
 - *Chemosphere*
 - *Nutrition Journal*
 - *Clinical Nutrition*
-

Milk Thistle Extract

What it is

A standardized extract containing silymarin.

Why we chose it

Supports healthy liver function and antioxidant activity.

Research Organizations

- National Institutes of Health (NIH)
 - Office of Dietary Supplements (ODS)
 - National Center for Complementary and Integrative Health (NCCIH)
 - National Cancer Institute (NCI)
 - National Library of Medicine (PubMed)
 - *Phytotherapy Research*
 - *World Journal of Gastroenterology*
 - *Journal of Hepatology*
-

Every Ingredient. Every Purpose.

Unlike formulas that rely on a single "hero ingredient," Tamarinse™ combines multiple plant-derived compounds supported by research from leading scientific institutions and peer-reviewed journals.

Medical Advisory Board (We can Keep the One we Have for Now)

Large physician portraits.

Professional biographies.

Credentials.

Research.

Clinical philosophy.

Published work.

A premium trust-building section.

Why Tamarinse™?

Three animated pillars.

Daily Defense

Designed for everyday environmental exposure.

Clean Ingredients

Plant-based, physician formulated, and clinically studied.

Smarter Delivery

Delayed-release technology helps deliver ingredients where they're intended to work.

Everyday Exposure

Lifestyle photography.

- Parents making lunch
- Office workers
- Coffee shops
- Airports
- Gym bags
- Plastic water bottles
- Takeout meals
- Grocery shopping

Message:

Exposure happens every day.

Reviews

Luxury layout.

Customer testimonials.

Physician reviews.

Video stories.

Minimal distractions.

FAQ

We Can Keep the Ones we have for now.

Sticky Buy Bar

Appears after approximately 25% scroll depth.

Displays:
